

ABOUT US

MSA Bollards is an Australian owned designer, manufacturer and installer of an extensive range of fixed, removable, retractable, pivoted, electric light and custom-made bollards.

The business commenced in 1990 trading as Okal Sentry Bollards (Aus) – a leading bollard manufacturer for over 30 years.

MSA Bollards has acquired the sole rights to the Okal Sentry product range throughout Australia and New Zealand.

OUR COMMITMENT

MSA Bollards maintains its commitment to using quality Australian steel and other locally sourced components to ensure we manufacture a consistently high-quality product.

PRODUCT DESCRIPTION

Our Sentry Lock-In Bollards are surface mount removable bollards. When the bollard is removed the base plate height is only 20mm allowing vehicles to easily drive over it. Available in both round and square, with plain, powder coated, or stainless steel finishes these bollards suit a range of applications and can fit any aesthetic.

FEATURES & BENEFITS

The lock-in bollards feature an internal locking system that cannot be tampered with. Keyed alike, master keyed and other higher security systems are available. It can come in a flat or slope top design in various diameters and heights. These include 90, 101, 115, 140, and 165mm Round diameters and 65, 90, or 100mm square.

DESIGNED FOR

- The security of parking spaces and visibly deters people using your car space
- Preventing access into designated areas. For Example: Footpaths, Bikeways.

OUR PRODUCTS

MSA Bollards manufacture a wide range of fixed, removable, retractable, pivoted, architectural, electric and light bollards.

Our bollards can be supplied galvanised, powder coated or in a polished stainless steel finish to suit your needs.

We have trained installers who can install these bollards in-ground or surface mounted as required.

Non-fixed bollards can be supplied with various security locking systems.

OUR PROMISE

At MSA Bollards we build our products to last.

Our professional team offers service and repairs on all our products as needed in any circumstance such as incurred damage or just general 'wear and tear' maintenance.
