

RETRACTABLE

ABOUT US

MSA Bollards is an Australian owned designer, manufacturer and installer of an extensive range of fixed, removable, retractable, pivoted, electric light and custom-made bollards.

The business commenced in 1990 trading as Okal Sentry Bollards (Aus) – a leading bollard manufacturer for over 30 years.

MSA Bollards has acquired the sole rights to the Okal Sentry product range throughout Australia and New Zealand.

OUR COMMITMENT

MSA Bollards maintains its commitment to using quality Australian steel and other locally sourced components to ensure we manufacture a consistently high-quality product.

Sentry MK2 Manual Retractable Bollard

The MK2 is the entry-level retractable solution within the Sentry range, offering straightforward manual operation for sites that do not require assisted or automated systems.

PRODUCT DESCRIPTION

The Sentry MK2 Manual Retractable Bollard is a simple, durable and cost-effective solution for controlled vehicle access in commercial and industrial environments.

Designed for sites that require occasional access restriction without the need for assisted or automated systems, the MK2 operates via a manual lift mechanism using a T-handle tool. When not in use, the bollard retracts fully into its in-ground housing, sitting flush with the surrounding surface to maintain clear access for pedestrians and vehicles.

With no reliance on electrical or pneumatic systems, the MK2 offers dependable long-term performance with minimal servicing requirements.

FEATURES & BENEFITS

Fully Manual Operation – Straightforward lift and lower design.

No Power Required – Completely self-contained mechanical system.

Flush Retractable Design – Stores securely within its in-ground sleeve.

Cost-Effective Access Control – Ideal for budget-conscious projects.

Durable Construction – Manufactured using quality Australian steel and locally sourced components.

High Security Locking Options – Compatible with Bi-lock, Abloy and Evva locking systems (optional extra).

Multiple Finish Options – Available galvanised, powder coated or polished stainless steel.

The MK2 is engineered for reliability in Australian conditions and is well suited to sites with low to moderate usage frequency.

OUR PRODUCTS

MSA Bollards manufacture a wide range of fixed, removable, retractable, pivoted, architectural, electric and light bollards.

Our bollards can be supplied galvanised, powder coated or in a polished stainless steel finish to suit your needs.

We have trained installers who can install these bollards in-ground or surface mounted as required.

Non-fixed bollards can be supplied with various security locking systems.

OUR PROMISE

At MSA Bollards we build our products to last.

Our professional team offers service and repairs on all our products as needed in any circumstance such as incurred damage or just general 'wear and tear' maintenance.
