

Born from a brilliant 1991 Australian patent by visionary designer Eugene O'Callaghan, the legendary Okal Sentry Parking Pivot bollard has protected commercial and residential properties across Australia and New Zealand for over 35 years. Today, expertly manufactured right here in South Australia by MSA Bollards, it remains the premier choice for premium, reliable vehicle control.

Okal Sentry Parking Pivot Bollards provide a simple and effective solution for securing and controlling access to parking spaces. Designed for ease of use, the pivoting mechanism allows the bollard to be raised or lowered as required, offering reliable protection, flexible access and a durable solution for commercial and private parking areas.

Bollard			Base Plate		Locking Type	Finish	Product Code
Length	Width	Depth	Length	Width
